| Roll | No. | | Total No. of Pages: 02 | | |
|---|--|---|---|--|--|
| Total No. of Questions: 09 | | | | | |
| B.Tech. (Sem1&2) | | | | | |
| ENGINEERING CHEMISTRY | | | | | |
| Subject Code: BTCH-101 (2011 Batch) | | | | | |
| Paper ID : [A1106] | | | | | |
| Time | e:3 | Hrs. | Max. Marks: 60 | | |
| TNICT | rd I (| TON TO CANDIDATES. | .01 | | |
| INSTRUCTION TO CANDIDATES: | | | | | |
| 1. 2. | | CTION-A is COMPULSORY. Sempt any FIVE questions from SECTION | I - B & C. | | |
| 3. | | cting at least TWO questions from SEC | | | |
| 1 | 1, | | | | |
| 13 | | SECTION-A | $(10 \times 2 = 20 \text{ Marks})$ | | |
| 1 | Whit | 10 | (10 × 2 = 20 Maria) | | |
| 1. | | e short notes on : What are coercing colloids? | | | |
| | | | forbidden transition? | | |
| | (b) What is the difference between allowed and forbidden transition?(c) What is the range of peak identification region in IR spectrum? | | | | |
| | (d) Discuss metal alloys for corrosion control. | | | | |
| | (e) Sharp peaks are seldom observed in UV spectrum. Explain. | | | | |
| | | Milliequivalent per litre of hardness = | - | | |
| (g) Give the possible electronic excitations for : | | | | | |
| (i) CH ₂ CH=CH ₂ (ii) CH ₃ CHO | | | | | |
| | | How ¹ H NMR can be used to distingui | sh p-CH ₂ C ₆ H ₄ CH ₃ from | | |
| | | $C_2H_5C_6H_5$? | - 3043 | | |
| | | Mention two examples of photochemical readileld. | ctions having low quantum | | |
| | (j) V | What is Green Chemistry? Why is it called | l so ? | | |
| | | SECTION-B | | | |
| 2. | (a) T | | na of a spectral line | | |
| ∠. | (a) L | Discuss factors contributing to the broadening | ig of a spectial lille. | | |

(b) Discuss IR spectroscopy and its applications.

(4,4)

[A-12]-13

| 3. | (a) | Photobromination of cinnamic acid to dibromocinnamic acid was carried |
|----|-----|---|
| | | out in blue light of wavelength 440 nm at 35°C using light intensity of |
| | | 1.5×10^{-3} J per second. An exposure of 20 minutes produced a |
| | | decrease of 0.075 millimole of bromine. The solution absorbed 80% |
| | | of the light passing through it. Calculate the quantum yield of the |
| | | reaction. |

- (b) Discuss supra molecular photochemistry. (4,4)
- 4. (a) Explain priming and foaming in boilers
 - (b) Discuss hot lime soda process of water softening. (4,4)
- 5. (a) Discuss the use and advantages of water and ionic liquids as solvents in organic reactions.
 - (b) What are microwaves? How these waves can speed up the chemical reaction? (4,4)

PART - C

- 6. (a) What do you understand by Galvanic corrosion?
 - (b) Explain the use of inhibitors for corrosion control. (4,4)
- 7. (a) What is polymerization? Discuss its types.
 - (b) Discuss polymer reinforced composites. (4,4)
- 8. (a) Discuss nanocrystals.
 - (b) Give the applications of nanochemistry. (4,4)
- 9. (a) How crude oil is classified? Discuss the production of ethylene.
 - (b) Discuss natural gas liquids. (4,4)
